## Supported Features

The ISPAPI Pricing Importer add-on supports the following features:

- Load TLDs with prices through three possible ways
  - HEXONET costs
  - HEXONET Price Classes
  - Custom CSV file
- Update existing extensions
- Flexible performance of step-wise pricing imports
- Support for different currencies
- Bulk price update by using a factor or a fixed amount
- Edition of prices individually
- Supported fields:
  - TLD
  - Register/Transfer/Renew pricing
  - DNS Management
  - Email Forwarding
  - ID Protection
  - EPP Code
  - Currency

**Deleting extensions can only be done manually in the WHMCS backend.**

## Installation

Copy all files from the **install/** subdirectory to your WHMCS installation root directory (**\$YOUR\_WHMCS\_ROOT**), while keeping the folder structure intact.

E.g.

```
install/modules/addons/ispapidpi/ispapidpi.php  
=> $YOUR_WHMCS_ROOT/modules/addons/ispapidpi/ispapidpi.php
```

**Note:** Make sure the value of variable 'max\_input\_vars' is higher in your php.ini file. We recommend at least 3000 as a value. The lower value of this variable (default value 1000) results in pricing importer module fail to import a larger number of TLDs.

## Configuration

### Addon activation

Within the WHMCS Admin area, go to

**Setup > Addon Modules**

» ISPAPI Pricing Importer Quickly update your WHMCS domain pricing list.	2.0	HEXONET	Activate	Deactivate	Configure
-----------------------------------------------------------------------------	-----	---------	----------	------------	-----------

  

Admin username	<input type="text" value="admin"/>	[REQUIRED]
Access Control	Choose the admin role groups to permit access to this module: <input checked="" type="checkbox"/> Full Administrator <input type="checkbox"/> Sales Operator <input type="checkbox"/> Support Operator	

Save Changes

Activate the ISPAPI Pricing Importer Addon, fill your admin username and give the module “Full Administrator” Access Control right.

### Addon configuration

Within the WHMCS Admin area, go to

**Addons > ISPAPI Pricing Importer**

**You are now ready to quickly update your pricing list.**

## How can I update my prices?

In order to load and update your prices, simply follow the next steps:

### Step 1 – Load prices

- Load your own HEXONET costs or a HEXONET price class or upload a CSV file
  - If you choose to upload a CSV file, you can download a sample CSV file.
  - Edit the generated CSV file by adding new TLDs with your new prices.

STEP 1 - LOAD PRICES

STEP 2 - UPDATE PRICES

STEP 3 - IMPORT PRICES

### Bulk Price update

Using Factor:   Fixed Amount:

TLD	Register		Renew		Transfer		Currency	
	Cost	Sale	Cost	Sale	Cost	Sale	Cost	Sale
.com	10.00	<input type="text" value="10.00"/>	20.00	<input type="text" value="20.00"/>	15.00	<input type="text" value="15.00"/>	USD	<input type="text" value="USD"/>
.org	10.00	<input type="text" value="10.00"/>	20.00	<input type="text" value="20.00"/>	15.00	<input type="text" value="15.00"/>	USD	<input type="text" value="USD"/>

### Domain Addons

☐ DNS Management
 ☐ Email Forwarding
 ☐ ID Protection
 ☐ EPP Code

Import

- In this step, actual costs and selling costs of each TLDs are displayed.
- You can update the prices in bulk by using a factor or a fixed amount.
  - Or you can edit sale prices individually.
- Additionally, you can select currency with which you would like to sell each TLD.
- Furthermore, you can select domain addons.

- If you wish to change your selection of TLDs, the module allows you to go back to previous steps and make a new selection.
